

CareerGuid AI Web Flow Document

Web Flow Document

Project: CareerGuid AI / SkillSight

Document Type: UX Web Flow Specification

Prepared For: AI Coding Agent Implementation

Role Perspective: UX Strategist

1. App Structure Overview

CareerGuid AI is a web app with these major areas:

```
Public Website
-> Authentication
-> Resume-first Onboarding
-> User Dashboard
-> Skill Gap Analysis
-> RAG Roadmap
-> ATS Resume Builder
-> Progress Tracking + Reminder System
-> Payment / Upgrade
-> Admin Panel
```

2. User Roles

2.1 Guest User

Can access:

```
/
/features
/pricing
/login
/signup
/forgot-password
```

Cannot access:

```
/dashboard  
/onboarding  
/roadmap  
/resume-builder  
/admin
```

If guest tries protected route, redirect to:

```
/login?redirect=/requested-path
```

2.2 Registered User

Can access:

```
/onboarding  
/dashboard  
/profile  
/skill-gap  
/roadmap  
/resume-builder  
/settings  
/billing
```

2.3 Admin

Can access:

```
/admin  
/admin/users  
/admin/job-roles  
/admin/knowledge-base  
/admin/logs  
/admin/reminders
```

3. Global Navigation Rules

3.1 Public Navbar

Visible on:

```
/
/features
/pricing
/login
/signup
```

Navbar items:

```
Logo: CareerGuid AI
Home
Features
Pricing
Login
Get Started
```

Button	Action
Logo	Navigate to /
Home	Navigate to /
Features	Navigate to /features
Pricing	Navigate to /pricing
Login	Navigate to /login
Get Started	Navigate to /signup

3.2 Authenticated Sidebar

Visible after login.

Sidebar items:

```
Dashboard
Skill Gap
Roadmap
Resume Builder
Profile
Billing
Settings
Logout
```

Item	Route
Dashboard	/dashboard
Skill Gap	/skill-gap
Roadmap	/roadmap
Resume Builder	/resume-builder
Profile	/profile
Billing	/billing
Settings	/settings
Logout	Clear session and redirect to /login

3.3 Route Guard Rules

After login:

```
If email not verified -> /verify-email  
If onboarding not completed -> /onboarding/upload-resume  
If onboarding completed -> /dashboard
```

4. Full Route Map

Page	Route	Access
Landing Page	/	Public
Features Page	/features	Public
Pricing Page	/pricing	Public
Login	/login	Public
Signup	/signup	Public
Verify Email	/verify-email	Logged-in, unverified
Forgot Password	/forgot-password	Public
Reset Password	/reset-password	Public
Resume Upload Onboarding	/onboarding/upload-resume	User
Auto-filled Profile Review	/onboarding/review-profile	User
Onboarding Complete	/onboarding/success	User
Dashboard	/dashboard	User
Skill Gap	/skill-gap	User
Roadmap	/roadmap	User
Roadmap Detail	/roadmap/:roadmapId	User

Admin Users	/admin/users	Admin
Admin Job Roles	/admin/job-roles	Admin
Admin Knowledge Base	/admin/knowledge-base	Admin
Admin Reminder Logs	/admin/reminders	Admin
404 Page	*	All

5. Public Website Flow

5.1 Landing Page

Route:

/

Purpose: Explain product and convert visitors into users.

Sections:

Hero Section
Problem Section
How It Works
Features
AI Workflow Preview
Pricing Teaser
FAQ
Footer

Hero content:

Title: Build a job-ready career path with AI
Subtitle: Upload your resume, discover missing skills, generate a personalized roadmap, and create an ATS-friendly resume.
Primary CTA: Get Started
Secondary CTA: View Features

Button	Behavior
Get Started	Navigate to /signup
View Features	Navigate to /features
Login	Navigate to /login

Empty state: Not needed.

Error state:

Something went wrong while loading the page. Please refresh.

5.2 Features Page

Route:

/features

Feature cards:

Resume-first onboarding
AI resume parsing
Skill gap analysis
RAG-based roadmap
Weekly reminders
ATS resume builder
Progress dashboard

CTA:

Start Your Career Analysis

Button behavior:

Click -> /signup

5.3 Pricing Page

Route:

/pricing

Plans:

Free Plan
Pro Plan
Premium Plan

Free Plan

Includes:

1 resume upload
Basic skill gap analysis
Basic roadmap
Limited ATS resume generation

CTA:

Start Free

Behavior:

If guest -> /signup
If logged in -> /dashboard

Pro Plan

Includes:

Multiple resume uploads
Advanced roadmap
Weekly reminders
ATS resume downloads
Priority AI generation

CTA:

Upgrade to Pro

Behavior:

If guest -> /signup?plan=pro
If logged in -> /billing/checkout?plan=pro

Premium Plan

Includes:

AI mock interview
Advanced ATS scoring
Multiple role-based resumes
Career assistant chat

CTA:

Upgrade to Premium

Behavior:

If guest -> /signup?plan=premium
If logged in -> /billing/checkout?plan=premium

6. Authentication Flow

6.1 Signup Page

Route:

/signup

Fields:

Full Name
Email
Password
Confirm Password

Field	Rule
Full Name	Required, minimum 2 characters
Email	Required, valid email
Password	Minimum 8 characters
Confirm Password	Must match password

Buttons:

Create Account
Continue with Google, optional
Already have an account? Login

Primary button behavior:

Click Create Account
-> Disable button
-> Show loading: Creating account...
-> Call signup API / Supabase Auth
-> If success -> /verify-email
-> If error -> show inline error

Success message:

Account created successfully. Please verify your email.

Error	UI Message
Email already exists	This email is already registered. Please login.
Weak password	Password must be at least 8 characters.
Network error	Unable to create account. Please try again.

6.2 Verify Email Page

Route:

/verify-email

Purpose: Verify user email using OTP or email verification link.

UI:

Title: Verify your email
Subtitle: Enter the OTP sent to your email.
OTP input: 6 digits
Button: Verify Email
Secondary Button: Resend OTP

Button	Behavior
Verify Email	Validate OTP and activate account
Resend OTP	Send new OTP, start 60-second cooldown
Change Email	Navigate back to signup or settings

Success:

Email verified successfully.
Redirecting to onboarding...

Redirect:

/onboarding/upload-resume

Error	Message
Wrong OTP	Invalid OTP. Please check and try again.
Expired OTP	OTP expired. Please request a new one.
Too many attempts	Too many attempts. Please try again later.

6.3 Login Page

Route:

/login

Fields:

Email
Password

Buttons:

Login
Forgot Password
Create Account

Login behavior:

```
User enters email and password
-> Click Login
-> Disable button
-> Show loading: Logging in...
-> Validate credentials
-> If email not verified -> /verify-email
-> If onboarding not completed -> /onboarding/upload-resume
-> If onboarding completed -> /dashboard
```

Rate-limit UX note:

The system should support at least 100 successful user logins per minute system-wide. Legitimate successful logins should not be blocked by failed-attempt protection.

Failed attempts error:

Too many failed login attempts. Please wait 1 minute and try again.

Error	Message
Wrong credentials	Invalid email or password.
User not found	Invalid email or password.
Network error	Login failed. Please check your connection.

6.4 Forgot Password Page

Route:

/forgot-password

Fields:

Email

Button:

Send Reset Link / OTP

Behavior:

Enter email
-> Click Send Reset Link
-> Show loading
-> System sends password reset email
-> Show success message

Success state:

If an account exists with this email, password reset instructions have been sent.

Security note: Do not reveal whether email exists.

6.5 Reset Password Page

Route:

/reset-password

Fields:

New Password
Confirm New Password

Button:

Reset Password

Success:

Password reset successful. Please login again.

Redirect:

/login

7. Resume-First Onboarding Flow

7.1 Onboarding Step 1: Resume Upload

Route:

/onboarding/upload-resume

Purpose: User uploads resume first. No manual form appears before upload.

Page layout:

Title: Upload your resume to get started
Subtitle: We will auto-fill your profile using AI. You can edit or complete missing details later.
Upload Card
Supported formats: PDF, DOCX
Max size: 5 MB
Primary Button: Upload Resume
Secondary Button: Skip for now, optional

Upload component behavior:

Drag and drop resume
OR
Click Browse File

Accepted files:

.pdf
.docx

Rejected files:

.exe
.png
.jpg
.zip
.txt

Primary button behavior:

User selects file
-> Validate file type and size
-> Upload to Supabase Storage
-> Create resume parsing job
-> Show progress state
-> When parsing completes -> /onboarding/review-profile

Loading state:

Uploading your resume...
Analyzing your resume with AI...
Extracting your profile details...

Success state:

Resume analyzed successfully.

Error	Message	Button
Invalid file type	Please upload a PDF or DOCX resume.	Choose another file
File too large	File size must be less than 5 MB.	Choose another file
Upload failed	Resume upload failed. Please try again.	Retry
Parsing failed	We could not extract your resume details. You can retry or fill details manually.	Retry / Fill manually

Skip behavior:

Click Skip for now
-> Show confirmation modal:
Without resume upload, profile auto-fill and skill extraction will not work properly.
Buttons:
- Upload Resume
- Continue Manually

If user chooses Continue Manually:

/onboarding/review-profile?manual=true

7.2 Onboarding Step 2: Review Auto-Filled Profile

Route:

/onboarding/review-profile

Purpose: Show extracted data in editable form.

Page title:

Review your profile details

Subtitle:

We auto-filled details from your resume. Please edit incorrect fields and complete missing details.

Field behavior:

Each field should show:

Label
Input value
Source badge: Auto-filled / Manual / Missing
Confidence indicator, optional
Edit option

Fields:

Full Name
Email
Phone Number
Current City
Education
Work Experience
Skills
Projects
LinkedIn URL
GitHub URL
Portfolio URL
Target Job Role
Preferred Location
Work Preference
Expected Salary
Notice Period
Career Goal

Source badge rules:

Condition	Badge
Extracted from resume	Auto-filled
User manually added	Manual
Empty required field	Missing

Required fields:

Full Name
Email
Phone Number
Education
Skills
Target Job Role
Preferred Location
Work Preference

Optional fields:

Portfolio URL
Expected Salary
Notice Period
Career Goal

Buttons:

Save and Continue
Back
Re-upload Resume

Save and Continue

Validate required fields
-> If valid, save profile
-> Mark onboarding completed
-> Navigate to /onboarding/success

Re-upload Resume

Show confirmation modal:
Re-uploading resume may replace auto-filled details.
Buttons:
- Cancel
- Re-upload

If confirm:

/onboarding/upload-resume

Validation errors:

Field	Error
Empty full name	Full name is required.
Invalid email	Please enter a valid email.
Empty phone	Phone number is required.
No skills	Please add at least one skill.
No target role	Please select your target job role.
No work preference	Please select remote, hybrid, or onsite.

Success state:

Profile saved successfully.

7.3 Onboarding Success Page

Route:

/onboarding/success

UI:

Title: Your profile is ready
Subtitle: We have saved your details. Now let's analyze your skill gap.
Primary Button: Analyze Skill Gap
Secondary Button: Go to Dashboard

Button	Route
Analyze Skill Gap	/skill-gap
Go to Dashboard	/dashboard

8. Dashboard Flow

Route:

/dashboard

Purpose: Central home for logged-in user.

Dashboard cards:

Profile Completion
Resume Match Score
Target Role
Skill Gap Summary
Roadmap Progress
Pending Tasks
ATS Resume Status
Reminder Status

Primary actions:

Analyze Skill Gap
Generate Roadmap
Build ATS Resume
Continue Roadmap
Update Profile

Condition	Empty State
No resume uploaded	Upload your resume to get AI-powered recommendations.
No skill analysis	Analyze your skill gap to see missing skills.
No roadmap	Generate your personalized roadmap.
No ATS resume	Build your first ATS-friendly resume.

Button	Route
Upload Resume	/onboarding/upload-resume
Analyze Skill Gap	/skill-gap
Generate Roadmap	/roadmap
Build ATS Resume	/resume-builder
Continue Roadmap	/roadmap

9. Skill Gap Flow

Route:

/skill-gap

Purpose: Analyze user skills against target job role.

Page sections:

Current Profile Summary
Target Job Role Selector
Skill Gap Result
Recommended Skills
CTA to Generate Roadmap

User actions:

Select target job role
Click Analyze Skill Gap
View match score
View missing skills
Generate roadmap

Analyze Skill Gap

Check if user profile exists
-> Check if skills exist
-> Call skill gap API
-> Show loading
-> Render result

Loading state:

Analyzing your skills...
Comparing your profile with target role...

Success state:

Skill gap analysis completed.

Result UI:

Match Score: 58%
Current Skills
Missing Skills
Recommended Learning Order

Empty state:

You need to complete your profile before analyzing skill gap.
Button: Complete Profile

Error	Message
No skills found	Please add skills to your profile first.
No target role selected	Please select a target job role.
API failed	Could not analyze skill gap. Please try again.

CTA:

Generate Personalized Roadmap

Behavior:

Navigate to `/roadmap?generate=true`

10. RAG Roadmap Flow

10.1 Roadmap Page

Route:

`/roadmap`

Purpose: Generate and track roadmap.

If no roadmap exists:

Title: Generate your personalized roadmap
Subtitle: Based on your target role and missing skills.
Button: Generate Roadmap

If roadmap exists:

Show active roadmap
Show progress
Show weekly tasks
Show pending tasks

10.2 Generate Roadmap Flow

Button:

Generate Roadmap

Behavior:

Click Generate Roadmap
-> Check skill gap analysis exists
-> Create roadmap generation job
-> Show loading state
-> When complete, show roadmap

Loading state:

Generating your personalized roadmap...
Retrieving learning resources...
Creating week-wise tasks...

Success state:

Your roadmap is ready.

Error	Message
No skill gap found	Please complete skill gap analysis first.
AI generation failed	Roadmap generation failed. Please try again.
Rate limit reached	You have reached your daily roadmap generation limit.

10.3 Roadmap Detail Screen

Route:

/roadmap/:roadmapId

Roadmap UI:

Roadmap title
Target role
Progress percentage
Week-wise accordion
Task list
Due dates
Complete buttons

Task card fields:

Task title
Task description
Week number
Due date
Status: Pending / Completed
Button: Mark Complete / Reopen

Mark Complete

Click Mark Complete
-> Update task status
-> Update progress percentage
-> Show success toast

Success toast:

Task marked as completed.

Reopen

Click Reopen
-> Change status back to pending
-> Update progress percentage

10.4 Roadmap Reminder UX

Condition	Banner
User behind schedule	You have pending tasks for this week. Complete them to stay on track.
User inactive 7 days	You have been inactive for 7 days. Continue your roadmap today.
Reminder sent	We sent you a reminder email about pending tasks.

Reminder email is automatic. User does not manually trigger it.

User can see reminder logs:

Last reminder sent: 27 June 2026
Reason: Week 2 pending tasks

11. ATS Resume Builder Flow

Route:

```
/resume-builder
```

Purpose: Generate ATS-friendly resume.

Initial screen:

```
Title: Build ATS-friendly resume
Subtitle: We will use your profile and target role to generate a professional resume.
Button: Generate Resume
```

User actions:

```
Generate resume
Preview resume
Edit resume content
Download PDF
Download DOCX
```

Generate behavior:

```
Click Generate Resume
-> Check user profile exists
-> Check target role exists
-> Retrieve ATS keywords
-> Generate resume content
-> Show preview
```

Loading state:

```
Generating your ATS-friendly resume...
Optimizing keywords...
Improving project descriptions...
```

Success state:

```
Your ATS-friendly resume is ready.
```

Editor sections:

Summary
Skills
Education
Projects
Experience
Certifications
Links

Button	Behavior
Edit Section	Make section editable
Save Changes	Save edited content
Download PDF	Generate/download PDF
Download DOCX	Generate/download DOCX
Regenerate	Generate new version

Error	Message
Missing profile	Please complete your profile first.
Missing target role	Please select a target job role first.
AI failed	Resume generation failed. Please try again.
Download failed	Could not download resume. Please retry.
Free limit reached	Upgrade to generate more resumes.

12. Profile Page Flow

Route:

/profile

Purpose: User can view and edit profile.

Sections:

Personal Details
Education
Experience
Skills
Projects
Links
Career Preferences
Resume History

Buttons:

Edit Profile
Save Changes
Cancel
Upload New Resume

Edit Profile

Enable form fields

Save Changes

Validate fields
Save changes
Show success toast

Upload New Resume

Navigate to /onboarding/upload-resume?source=profile

Success state:

Profile updated successfully.

Error state:

Could not update profile. Please try again.

13. Billing and Upgrade Flow

Route:

/billing

Purpose: Manage plan and upgrade.

Billing page sections:

Current Plan
Usage Limits
Available Plans
Billing History
Upgrade CTA

Plans:

Free
Pro
Premium

Usage indicators:

Resume uploads used
Roadmap generations used
ATS resume generations used
AI assistant messages used

Example:

ATS Resume Generations: 1 / 3 used
Roadmap Generations: 2 / 5 used

13.1 Upgrade Flow

User clicks:

Upgrade to Pro

Flow:

Click Upgrade
-> Open plan confirmation screen
-> Select billing cycle: Monthly / Yearly
-> Click Continue to Payment
-> Redirect to payment provider checkout
-> Payment success or failure

Routes:

```
/billing
/billing/checkout?plan=pro
/billing/success
/billing/failed
```

Payment provider options:

```
Razorpay for India
Stripe for international
```

13.2 Checkout Page

Route:

```
/billing/checkout
```

UI:

```
Selected Plan
Plan Features
Billing Cycle
Price
Button: Pay Now
Button: Cancel
```

Button	Behavior
Pay Now	Open payment checkout
Cancel	Return to /billing

13.3 Payment Success Page

Route:

```
/billing/success
```

UI:

```
Title: Payment successful
Subtitle: Your plan has been upgraded.
Button: Go to Dashboard
```

Behavior:

Update user subscription
Redirect to dashboard

13.4 Payment Failed Page

Route:

/billing/failed

UI:

Title: Payment failed
Subtitle: We could not complete your payment.
Buttons:
- Try Again
- Back to Billing

13.5 Upgrade Prompt Modals

Show upgrade modal when user reaches limit.

Examples:

You have reached your free ATS resume generation limit.
Upgrade to Pro to generate more resumes.

Buttons:

Upgrade Now
Maybe Later

Button	Route
Upgrade Now	/billing/checkout?plan=pro
Maybe Later	Close modal

14. Settings Flow

Route:

/settings

Sections:

Account Settings
Notification Preferences
Password Settings
Delete Account

Notification preferences:

Weekly roadmap reminders
Motivational emails
Resume analysis emails
Product updates

Toggle behavior:

Toggle ON/OFF
-> Save preference immediately
-> Show toast: Preferences updated.

Delete account flow:

Click Delete Account
-> Show confirmation modal
-> User types DELETE
-> Confirm
-> Deactivate/delete account
-> Logout

15. Admin Flow

15.1 Admin Dashboard

Route:

/admin

Cards:

Total Users
Completed Onboarding
Resume Uploads
Roadmaps Generated
Reminder Emails Sent
Failed AI Jobs

15.2 Admin Users Page

Route:

/admin/users

Admin actions:

Search users
View profile
View roadmap progress
Disable user
Change role

15.3 Admin Job Roles Page

Route:

/admin/job-roles

Actions:

Create job role
Edit job role
Delete job role
Add required skills
Set skill priority

Button behavior:

Add Job Role -> open modal
Save -> create role
Edit -> open edit modal
Delete -> confirmation modal

15.4 Admin Knowledge Base Page

Route:

/admin/knowledge-base

Actions:

Upload document
Add manual content
Generate embeddings
Edit document
Delete document

Empty state:

No knowledge base documents yet. Add your first document to improve RAG responses.

15.5 Admin Reminder Logs Page

Route:

/admin/reminders

Shows:

User
Roadmap
Reminder type
Email status
Sent date

Filters:

Reminder type
Email sent status
Date range

16. Empty States Summary

Screen	Empty State
Dashboard no resume	Upload your resume to start your AI career analysis.
Dashboard no roadmap	Generate a roadmap to start your learning journey.
Skill Gap no profile	Complete your profile before analyzing skill gap.
Roadmap no tasks	No roadmap tasks found. Generate a roadmap first.
Resume Builder no profile	Complete your profile to generate ATS resume.
Billing no history	No billing history available.
Admin users empty	No users found.
Knowledge base empty	No documents added yet.

17. Error States Summary

Situation	Message
Network error	Something went wrong. Please check your connection and try again.
Unauthorized	Your session has expired. Please login again.
Forbidden	You do not have permission to access this page.
Resume upload failed	Resume upload failed. Please try again.
Resume parsing failed	We could not extract details from your resume. Retry or fill manually.
AI generation failed	AI generation failed. Please try again.
Payment failed	Payment failed. Please try again.
Rate limit reached	Too many requests. Please try again later.
Server error	Server is temporarily unavailable. Please try again later.

18. Success States Summary

Action	Success Message
Signup	Account created successfully. Please verify your email.
Email verification	Email verified successfully.
Login	Logged in successfully.
Resume upload	Resume uploaded successfully.
Resume parsing	Resume analyzed successfully.
Profile save	Profile saved successfully.
Skill gap	Skill gap analysis completed.
Roadmap generation	Your roadmap is ready.
Task complete	Task marked as completed.
ATS resume	Your ATS-friendly resume is ready.
PDF download	Resume downloaded successfully.
Payment	Payment successful. Your plan is upgraded.
Settings save	Settings updated successfully.

19. Main User Journey

New User Journey

Landing Page

- > Signup
- > Verify Email
- > Resume Upload
- > Auto-filled Profile Review
- > Edit / Complete Missing Details
- > Onboarding Success
- > Skill Gap Analysis
- > Generate Roadmap
- > Dashboard
- > Track Tasks
- > Receive Reminder Emails
- > Build ATS Resume
- > Download Resume

Returning User Journey

Login

- > Dashboard
- > Continue Roadmap
- > Mark Tasks Complete
- > Generate / Edit ATS Resume
- > Download Resume

User Behind Schedule Journey

User has pending roadmap tasks

- > Weekly scheduler checks progress
- > System sends reminder email
- > User clicks email link
- > User lands on Roadmap page
- > Pending week is highlighted
- > User completes task

Upgrade Journey

User reaches free limit

- > Upgrade modal appears
- > User clicks Upgrade Now
- > Checkout page
- > Payment
- > Payment success
- > Plan upgraded
- > User continues premium action

20. Button Behavior Rules

Global rules:

- All primary buttons must show loading state after click.
- All API buttons must be disabled while request is running.
- All destructive actions must show confirmation modal.
- All successful actions must show toast.
- All failed actions must show clear error message.

Primary button states:

Default
Hover
Loading
Disabled
Success
Error

Example:

Button: Generate Roadmap

Default text: Generate Roadmap
Loading text: Generating...
Success: Show toast and display roadmap
Error: Show error message and keep button enabled

21. Form Behavior Rules

All forms should support:

Inline validation
Required field indicators
Disabled submit until required fields valid
Auto-save optional for long forms
Clear error when user edits field

Validation style:

Red border on invalid field
Small error text below field
Toast only for form-level error

22. AI Coding Agent Implementation Notes

The frontend should implement:

ProtectedRoute component
PublicRoute component
AuthLayout
DashboardLayout
AdminLayout
Toast system
Modal system
Loading skeletons
EmptyState component
ErrorState component
FileUpload component
EditableProfileForm component
RoadmapTaskCard component
PlanCard component
UpgradeModal component

Recommended component structure:

```

│   ├── api.ts
│   ├── auth.service.ts
│   ├── onboarding.service.ts
│   ├── roadmap.service.ts
│   └── billing.service.ts
├── hooks/
├── store/
├── utils/
└── routes/
```

23. Final UX Summary

CareerGuid AI should feel like a guided career assistant, not a complex dashboard.

The ideal experience is:

Upload resume first
-> Let AI do the heavy work
-> User only edits or completes missing details
-> Show clear skill gap
-> Generate simple week-wise roadmap
-> Help user stay consistent through reminders
-> Help user apply better with ATS resume

Main UX principle:

Reduce manual effort, give clear next steps, and keep the user motivated until they become job-ready.
